

International / Political Policy Analysis on Africa and the African Union in the 21st Century

Project Title	International / Political Policy Analysis on Africa and the African Union in the 21st Century
Project Summary	Development of Issues Briefers on Select Topics in Africa and Related to the African Union. Two teams of three to four e-Interns to undertake development of policy briefs on a range of topics related to the African Union and Africa.
Country	Ethiopia
Country/Region of Focus	Africa

Project Description

The two teams would be asked to develop a set of briefing memos -- similar to what often occurs in the U.S. Government, the foreign service / diplomatic community, and for that matter, many large organizations -- on a range of key issues important to the U.S. Mission to the African Union. We will provide example memos. The language should be "plain English / for the layperson." The audience for your products will be senior members of the U.S. Mission to the African Union team. Topics will range from Trade, Food Safety in Africa, Electricity Markets in Africa, the African Medicines Agency (and issues surrounding these topics).

Ideally, the products or analytic briefing memos would provide all the basic background and key issues that a policy maker -- an Ambassador or a senior political adviser at U.S. Embassy -- would need to fully grasp the key issues of a subject and be able to himself / herself brief and explain the issue to other officials.

Required Skills or Interests

Skill(s)

Analytical writing

Economic analysis

Political Analysis

Research

Additional Information

We envision two teams of three to four team members working on Google Drive. Each team will be given key topics to begin working on. Each team will work on separate topics.

Language Requirements
